SUMMARY

Designing products that make complexity feel simple. 12 years across startups and global platforms — from building design systems to leading product design for 10M+ users. Now expanding into design with AI.

EXPERIENCE

Lead Product Designer — ESPNCricinfo 2021 – Present · 4.5+ yrs
ProximityWorks (Employee) · Client: ESPN

- Built ESPN's design system from scratch — scaling to 200+ Figma files, 50+ components across web, iOS, Android, and dark mode.
- Led homepage redesign championing casual users (80% of traffic); reduced bounce rates ~20–30% and improved returning user sessions ~15%.
- Drove native app transition (hybrid to native), including Dynamic Island on iOS and pinning features on Android.
- Owned design ops end-to-end: ZeroHeight documentation, stakeholder reporting, and cross-team alignment within the ESPN/Disney org.

Sr. Product Designer 2019 – 2021
Decimal · Gurgaon

- Led design across two products: Saarthi (fintech lending for field agents) and Vahana (no-code platform for UIs, workflows, and APIs).
- Built both design systems from scratch — reduced screen design and dev handoff time by ~40%.
- Delivered Vahana MVP in under 6 months, enabling early NBFC partnerships and product validation.

Product Designer 2018 – 2019
FabHotels · Gurgaon

- Redesigned the full website and app — homepage, hotel listings, and checkout — reducing booking funnel drop-offs by ~15–20%.
- Initiated FabHotels' first component library; used heatmaps and session recordings to drive iterative improvements.

UX/UI Designer 2014 – 2018
Cognizant · Gurgaon

- Worked across enterprise clients (American Express, Papa John's) — research, heuristic audits, task flows, and UI execution end-to-end.
- Designed PocketDash — an analytical dashboard for Amex marketers to track credit card offers, conversions, and campaign performance.

Web Designer 2013 – 2014
DogSpot · Gurgaon

- Designed UX and UI for an early-stage e-commerce platform; first product role after transitioning from front-end development.

Web Designer 2012 – 2013
Pyrumas · Gurgaon

- Designed solutions for clients as per requirements in Education, Travel, and Transport domains.

SKILLS

EXECUTION

- UX Research
- Design Systems
- Interaction Design
- Prototyping
- Information Architecture
- Heuristic Evaluation
- Visual Design
- Design Ops

STRATEGY

- Product Strategy
- Design Vision
- Roadmap Planning

LEADERSHIP

- Design Leadership
- Cross-functional Collaboration
- Design Critique
- Mentorship
- Stakeholder Alignment

PROCESS

- Agile / Scrum
- Design Thinking
- Workshop Facilitation

RESEARCH

- User Interviews
- Usability Testing
- Journey Mapping
- Competitive Analysis

TOOLS

DESIGN

- Figma
- Miro / FigJam
- ZeroHeight

RESEARCH & ANALYTICS

- Hotjar
- Google Analytics
- VWO
- UserTesting
- UX Pilot

AI

- Claude
- ChatGPT
- Gemini
- Lovable
- Perplexity
- Pencil

EDUCATION

B.Tech, Computer Science

MAIET, Jaipur
2008 – 2012
