SUMMARY

12 years designing products for scale — from 0-to-1 systems at startups to leading design for a 100M+ user platform at ESPNCRicinfo. I lead and mentor a design team, own design systems and design ops end-to-end, and have driven measurable outcomes — including an app rating improvement from 3.4 to 4.5 and a successful native app launch on iOS and Android. I build with AI daily, across design systems, design work, and workflows.

EXPERIENCE

Lead Product Designer — ESPNCRicinfo

2021 – Present · 5+ yrs

ProximityWorks (Employee) · Client: ESPNCRicinfo

- ▶ Led design for ESPNCRicinfo's design system — scaled it with the team to 200+ Figma files and 100+ components across web, iOS, Android, and dark mode.
- ▶ Led homepage redesign championing casual users (80% of traffic); reduced bounce rates ~30% and improved returning sessions ~15%.
- ▶ Drove native app launch on iOS and Android (hybrid to native transition), including Dynamic Island and pinning features — contributed to app rating improving from 3.4 to 4.5.
- ▶ Own design ops end-to-end: ZeroHeight documentation, stakeholder reporting, and cross-team alignment across the ESPN/Disney org.
- ▶ Ran multiple AI workshops for the design team and established a shared AI-assisted workflow — using Figma AI for concept generation — that the team continues to build on, scaling design output beyond individual use.
- ▶ Lead a 2-person design team across parallel workstreams (design system, homepage), mentoring on craft and growth.

Sr. Product Designer

2019 – 2021

Decimal · Gurgaon

- ▶ Led design across two products — Saarthi, a two-sided lending marketplace connecting NBFC lenders with borrowers through field agents (loan application, matching, and approval flows), and Vahana (no-code

platform for UIs, workflows, and APIs) — leading a 2-person team across both.

- ▶ Built both design systems from scratch — reduced screen design and dev handoff time by ~40%.
- ▶ Delivered Vahana MVP in under 6 months; Saarthi's speed enabled early NBFC partnerships and product validation.

Product Designer

2018 – 2019

FabHotels · Gurgaon

- ▶ Redesigned the hotel listing page and full checkout funnel — made pricing, discount placement, and tax display decisions to optimize for click-through and conversion; reduced booking funnel drop-offs ~15–20%.
- ▶ Led usability testing and user research end-to-end, including on-road user interviews, heatmapping, and session recording analysis to pinpoint funnel breakdowns, synthesized into insight reports that shaped design decisions.
- ▶ Contributed to FabHotels' first design system, initiated by the design manager.

UX/UI Designer

2014 – 2018

Cognizant · Gurgaon

- ▶ Designed AI, AR, data science, and iBeacon-driven solutions for major brands including American Express, Telstra, Prudential, and Singtel Optus.
- ▶ Designed PocketDash and a marketing-campaign dashboard for American Express, plus a chatbot — B2B analytics tools for tracking offers, conversions, and campaign performance.
- ▶ Led heuristic evaluation and research-driven design for Papa John's, including a working-hours estimation and concept pitch; also designed employee and patient management tools and an in-house event app.
- ▶ Built foundational UX practice — competitive analysis, wireframing, user research, journey mapping, and end-to-end UI execution — the starting point of the transition from front-end development into product design.

Web Designer

2012 – 2014

DogSpot · Pyrumas · Gurgaon

- ▶ Transitioned from front-end development into product design; redesigned e-commerce and service product experiences across education, travel, and transport domains.
